PROFESSIONAL SUMMARY

An innovative and result-oriented frontend engineer with 3+ years of experience building scalable web and mobile applications across e-commerce, healthcare, and AI-driven products. Proficient in JavaScript, TypeScript, React, Next.js, React Native, Node.js, GraphQL, PostgreSQL, and modern frontend frameworks, with strong experience developing responsive interfaces, reusable components, API integrations, and cross-platform solutions. Proven ability to optimise application performance, improve code maintainability, streamline development workflows, and deliver intuitive user experiences. Experienced in Agile environments, collaborating with designers, backend engineers, and cross-functional teams to translate product requirements into reliable, scalable, production-ready applications.

SKILLS

- | | | |
|------------------------------------|----------------------------|--|
| • Client Service | • Team Leadership | • Frontend Development |
| • Time Management | • State Management | • Mobile App Development |
| • Customer Satisfaction | • Form Management | • Performance Optimization |
| • Version Control Systems | • TypeScript Proficiency | • Code Review & Peer Feedback |
| • Technical Problem-Solving | • Continuous Integration | • Cross-Functional Collaboration |
| • Data Structures & Algorithms | • Deployment Awareness | • Code Quality & Maintainability |
| • Healthcare Technology Solutions | • Effective Communication | • Agile Methodology Participation |
| • User-Centric Product Development | • Server-State Management | • Modular Design Pattern Implementation |
| • Progressive Web App Development | • Styling & UI Development | • Responsive & Pixel-Perfect UI Implementation |

TOOLS: React | Next.js | TypeScript | React Native | Redux Toolkit | React Query | TailwindCSS | Styled Components | MaterialUI | Webpack | React Hook Form | Formik | Yup | Git | GitHub | Bitbucket | ESLint | Prettier | HeroUI | JavaScript | Python | Linux | ClaudeAI, OpenAI | Coderabbit | Node.JS | Express | MySQL

WORK EXPERIENCE

Fullstack Developer

July 2026 – September 2026

TRIVESTACK

- Architected scalable e-commerce features for Trivestack, supporting independent storefronts across a multi-store platform.
- Engineered 18+ storefront and backend features using Vendure, Next.js, GraphQL, Apollo Client, and PostgreSQL.
- Integrated GraphQL APIs with Apollo Client, improving data retrieval efficiency by 32% across core shopping workflows.
- Customised Vendure functionality to support multi-store operations, contributing to a 27% improvement in platform scalability.
- Constructed responsive storefront components with Next.js, creating seamless shopping experiences across customer-facing interfaces.
- Optimised PostgreSQL data operations, strengthening application reliability and supporting consistent transactional performance.
- Connected frontend and backend services through GraphQL, enabling cohesive data flow across e-commerce functionality.
- Resolved application defects and integration challenges, reducing recurring technical issues by 24% through systematic debugging.
- Validated platform functionality across critical user journeys, maintaining dependable performance and consistent shopping experiences.

Mobile Developer

March 2026 – July 2026

INNOVASWIFT TECH

- Translated UI/UX designs into responsive mobile interfaces for THINA.ai across iOS and Android platforms.
- Implemented intuitive navigation patterns, creating smooth and accessible experiences across different mobile devices.
- Refactored application code to improve maintainability, readability, and adherence to established development standards.
- Refined mobile performance by 30%, applying efficient rendering and modern development practices across key user flows.
- Polished application interactions and visual elements, delivering a cohesive experience aligned with approved product designs.
- Tested mobile interfaces across iOS and Android environments, identifying usability issues and supporting production readiness.
- Coordinated frontend requirements with backend services, ensuring accurate data presentation and reliable application behaviour.
- Collaborated with designers and backend engineers, reducing interface integration issues by 25% through structured development coordination.
- Developed 20+ reusable interface components, improving consistency and accelerating implementation across core application screens.

LIFEBANK TECHNOLOGIES

- Developed and maintained responsive, high-performance web and mobile applications using JavaScript, React, Next.js, TypeScript, and React Native, ensuring cross-platform consistency and scalability.
- Collaborated with designers and backend engineers to translate UI/UX concepts into pixel-accurate, user-focused interfaces, reducing design-to-development gaps by 30%.
- Implemented modular architecture and reusable component libraries using Redux Toolkit, React Query, and structured design patterns, improving code maintainability and reducing technical debt by 25%.
- Optimized application performance through refactoring, lazy loading, and efficient state management, decreasing page load time by 40% and improving overall user experience.
- Participated actively in Agile workflows, including sprint planning, daily stand-ups, and retrospectives, contributing to a 20% increase in sprint delivery efficiency.
- Integrated robust form validation and state handling using React Hook Form, Formik, and Yup, reducing form-related errors and support tickets by 35%.
- Contributed to the development of a medical supply tracking system that streamlined inventory processes, improving operational efficiency by 45% and supporting measurable revenue growth for healthcare facilities.
- Maintained code quality standards using ESLint, Prettier, Git, and Bitbucket workflows, ensuring clean version control practices and smoother team collaboration.
- Styled scalable, responsive interfaces using TailwindCSS, Styled Components, and HeroUI, delivering consistent branding and mobile-first experiences across applications.

EDUCATION AND CERTIFICATION

B.Sc. – Industrial Relations & Human Resources Management | **Lagos State University, Lagos, Nigeria.** In View

Software Engineering Program | **Holberton School – ALX Africa, Nairobi, Kenya**

September 2022 – January 2024

INTERESTS

I enjoy reading about emerging technologies, researching industry trends, and connecting with fellow developers to exchange ideas. I find satisfaction in understanding user behavior, exploring UI/UX innovations, and contributing to technical decisions that help businesses build better digital products.
